- I've done numerous more projects, Feel free to contact to see more of my private and organizational work.

+ Skills Continued.

- I've worked in numerous other languages too,
- Worked on Python, Numpy, Tensor-flow, Keras, Open-CV, Nvidia CUDA for Machine Learning Development.
 - Worked on Back-end Technologies like GraphQL, Hasura and Python Flask.
 - Worked on Custom Styling with Scss, Mix-ins, Variables and Media Queries.
 - Worked on building Storybook from scratch and modifying it to my needs.
 - Worked for community, as I answer community questions too.

> TOOLS

+ Professional Tools

- Visual Studio Code, PHP Storm, Netbeans, Postman, MongoDB Compass, SQL Server, Git, Bit-bucket, MS Office, Adobe Photoshop, Adobe XD.

> PROJECTS

1 CFI REVIEW

CFIReview is a Review Website for Flying Instructors. I developed this website for an upwork client, she wanted custom designs and a fully responsive site. This site was developed using React, Node, Mongo, Scss and Ant Design.

Take a look at this site here - cfireview.com

2 OUR FAMILY TALES

Our Family Tales is a Story Telling Website. I developed this site for an upwork client too, she wanted a fully customizable questionnaire built into a new Shopify store, I did both to those things using some of Shopify's built-in functionalities, Vanilla Java-script and Scss.

Take a look at this site here - ourfamilytales.com

3 THE SEEK

The Seek is a Machine Learning based CCTV Surveillance System. I developed this project using React, Scss, Ant Design, Python, Python Flask, PyMongo, Numpy, Tensor-flow, Keras, Open-CV and Nvidia CUDA. This project captures CCTV Feed using Device IP's, runs an activity and an object detection model to detect suspicious activity and notify administration. The suspicious part is also recorded and stored for admin to review or use later. Demo can be provided upon request.

4 VOGUE JUNCTION

Vogue Junction is one of my own projects. The idea behind vogue junction is to combine the functionalities of an e-commerce site with the likes of YouTube, Instagram and Medium. Specially designed for Fashion Freelancers to showcase and sell their work exclusively. This site was developed using React, Node, Mongo and purely custom designed theme in Scss.
